

Data Acquisition

Bridge Mode PLC Connections

By using Simplinx SMX-RNS modules you can easily collect data from your machine park as shown in diagram.

You can access to all machine control devices like PLC&HMI from office network by using bridge mode of SMX-RNS

By using bridge mode your SCADA & OPC application can read & write all data to/from machine control devices.

You can easily enable bridge mode of SMX-RNS from web interface.

For more information & application references please contact us.
