

Simplinx Remote Access

Remote Access

You can connect to your remote devices with the Simplinx SMX-RNS module. SMX-RNS opens you a fast, direct and secure tunnel. All programs and functions will work as if you had a direct connection with your devices.

Connection Options

Ethernet, Serial (RS-232 & RS-485) & USB

Secure Connection

- Certificate based connection
- RSA Key 4096 Bit Certificate / SHA256
- Hardware Encryption and Password Protection

No Internet or IT Settings

No need for firewall or port configuration on client side. DHCP enabled as default. Client only needs to attach RJ-45 connector. That's all!
